

Building Your First Laravel Application (Tum Blog Application)

Date: 16/05//2023

This is an eight week project for the course and will be marked out of 50%. The project will be divided into eight sections or parts. You will be expected to complete each section after every session or Topic done within a week beginning the [1st/5/2023](#).

Part 3 of the project constitutes downloading a Bootstrap template and integrating it with Laravel. The steps include:

- i. Download a Bootstrap Template of choice
- ii. Customize the template
- iii. Use the routes and views create previously for home, about and contact us pages
- iv. Create a front end layout file
- v. Create includes or partials
- vi. Ingrate the parts to form a home page, about page and contact us page
